The Repository

This repository ("Code - OSS") is where we (Microsoft) develop the [Visual Studio Code](#) product together with the community. Not only do we work on code and issues here, we also publish our [roadmap](#), [monthly iteration plans](#), and our [endgame plans](#). This source code is available to everyone under the standard [MIT license](#).

About Laravel

Note: This repository contains the core code of the Laravel framework. If you want to build an application using Laravel, visit the main [Laravel repository](#).

Laravel is a web application framework with expressive, elegant syntax. We believe development must be an enjoyable, creative experience to be truly fulfilling. Laravel attempts to take the pain out of development by easing common tasks used in the majority of web projects, such as:

- [Simple, fast routing engine](#).
- [Powerful dependency injection container](#).
- Multiple back-ends for [session](#) and [cache](#) storage.
- Database agnostic [schema migrations](#).
- [Robust background job processing](#).
- [Real-time event broadcasting](#).

Laravel is accessible, yet powerful, providing tools needed for large, robust applications. A superb combination of simplicity, elegance, and innovation gives you a complete toolset required to build any application with which you are tasked.

Welcome to Rails

What's Rails?

Rails is a web-application framework that includes everything needed to create database-backed web applications according to the [Model-View-Controller \(MVC\)](#) pattern.

Understanding the MVC pattern is key to understanding Rails. MVC divides your application into three layers: Model, View, and Controller, each with a specific responsibility.

Problema?

- Muitas ferramentas open source
- Alta demanda por manutenção e evolução
- Poucas pessoas mantendo as soluções

Solução

- **Mostrar formas práticas de começar a contribuir com projetos open source**
- **Bônus 1: Portfólio para mostrar para recrutadores**
- **Bônus 2: "Give back" para a comunidade**

Requisitos, ambiente e recursos

Maneiras de Contribuir

- Curadoria de issues
- Revisando Pull Requests (Pedir para inserir testes)
- Reproduzir uma issue
- Compartilhar sua solução
- Melhorar a documentação
